

Table E1. The relationship between physical activity, fatigue and quality of life in participants with sarcoidosis.

	Correlation coefficient	p-value
	Subjective physical activity (overall IPAQ)*	
FAS	0.283	0.325
KSQ		
General Health	-0.491	0.077
Lung	-0.555	0.042
General Health + Lung	-0.407	0.148
	Objective physical activity (mean daily step counts) †	
FAS	0.041	0.884
KSQ		
General Health	-0.384	0.157
Lung	-0.196	0.484
General Health + Lung	-0.443	0.099

IPAQ = International Physical Activity Questionnaire; FAS = Fatigue Assessment Scale; KSQ = King's Sarcoidosis Questionnaire

*Spearman's rank correlation. †Pearson's correlation
